

Payments solution for

Balancer DAO

Metamouse is:

- a crypto-to-spend service for paying corporate and private bills
- a product of altercap.com

Licenses:

Virtual currency service provider

Money service business provider

Problems and solution for DAO

Old way

DAO struggles to pay business expenses

DAO couldn't verify accounts on centralised exchanges

DAO pays the bills, using personal accounts of employees

New way

DAO pays corporate expenses with metamouse app, using crypto

What problems does Metamouse solve?

Metamouse allows you to make **bank payments** using **crypto**, without the hustle of moving it to a centralized exchange, converting to **fiat** and withdrawing to your **bank account**.

Only using Metamouse you:

don't need a
bank account

can pay bills **quickly**
(within 24 h)

can use
cryptocurrency
directly **from your**
wallet - it's safe!

We serve in more than countries:

What cryptocurrencies are supported in Metamouse?

 Bitcoin

 Litecoin

 Ethereum

 USD Coin

 Tether

 DAI

 Tron

More cryptocurrencies, tokens
and networks are coming.

More soon...

How are payments made?

01

User fills in the payment form and select the cryptocurrency to pay with

03

Metamouse confirms the transaction and finds a peer to execute the payment

05

Metamouse confirms the payment and notifies the userh

02

User makes the payment in cryptocurrency

04

The peer pays the invoice

Metamouse P2P network

- Payments are executed by **«Verified Payers»**
- **«Verified Payer»** is corporate entity or private individual, who has provided full KYC
- Each Payer is **approved** by metamouse compliance
- Each Payer **earns** part of commission

Guarantees

- Each «Verified Payer» holds **collateral** with Metamouse to participate in the network
- Each Payer can pay invoices up to his **collateral level**
- If the invoice is **failed** to be paid in 24h:
 - Payer's **rating** is downgraded
 - Invoice is **passed** to another Payer

KYC and AML

checks **source** of crypto

checks **public information**
on the recipient of fiat funds

isn't collecting KYC
of users and DAOs

Roadmap
